Top Tips

Julie Hollobone

For your woodland garden, Julie suggests the delicate *Gillenia trifoliata*. It grows as a well behaved clump, forming tall stems to 3ft with leaves cut into three sections. In summer white starry flowers appear at intervals on the upper stem. In autumn, the foliage turns to yellow, then amber, giving one last burst of colour before the stems die. But even these stand well over winter.

Some of Julie Hollobone's favourite trees are *Acer Griseum*, for the bark and canopy, *Liriodendron* for the leaf shape, narrow canopy and presence in a garden and apple for the blossom.

Sunday 27th June
